

END-TO-END APPLICATION DEVELOPMENT

From discovery and requirements to production launch and beyond. Our team is highly experienced throughout the development lifecycle.

REQUIREMENT MANAGEMENT

At XTGlobal, requirement management isn't only a highly-structured process - it's paramount in ensuring a successful deliverable. We identify all relevant stakeholders to be included in the gathering process, then use techniques such as interviewing, prototyping, and documentation studies to develop sophisticated and descriptive "System Requirements Specification" documents.

- Internal Interview Process
- Solution Prototyping And Concept Review
- Formalized And Actionable Documentation

SOFTWARE DEVELOPMENT

We have extensive experience building software applications using Java and .NET technologies in conjunction with SQL Server & Oracle backend databases. For projects requiring an emphasis on user experience, our UI/UX designers are available to incorporate usability best practices and modern design standards into your final deliverable.

- REST API
- XML
- SDK
- WCF

ARCHITECTURE & DESIGN

After thorough analysis of system requirements, our highly skilled architects propose detailed design solutions, including the preferred project technology stack and development methodology. Once the proposed solution is agreed upon, our Project Managers can estimate the effort required to complete the project and prepare a detailed project plan.

- Expertise In Waterfall & Agile Methodologies
- Detailed Project Scoping
- Deliverable Timeline Proposals

MAINTENANCE & SUPPORT

To get the most out of your development investment, it's critical to keep maintenance and support top-of-mind. By carefully documenting development projects, our team can easily maintain your applications and enhance them as technologies advance or needs arise.

- Bug Fixing
- Software Upgrades
- Feature Development

WHAT SETS US APART?

It takes a combination of technology and business accumen to truly construct effective solutions. Our diverse industry expertise, management capabilities and technological capabilities have led us to continue our award-winning pedigree.

EXPERIENCE

We've been providing IT Services and consulting since 1998, and are proud to provide highly trained, tenured and experienced development resources.

GOVERNANCE

Our proven 3-tiered governance model offers the visibility and oversight required for successful development initiatives.

FLEXIBILITY

Our flexibility in both project structures and deliverable models allow our services to best suit your unique needs.

OUR PEDIGREE OF EXCELLENCE

- Oracle Platinum Partner
- CMMI Level3
- 2007-2009: Inc. 500 Fastest Growing Private Companies recipient
- 2008-2012: Dallas Top 100 award recipient
- 2009-2013: Tech Titans Award recipient
- 2010-2012: Deloitte Technology Fast 500 Award recipient
- 2010-2013: Inc. 5000 Fastest Growing Private Companies recipient
