“

At a time when the global technology landscape is going through a significant shift, the Indian IT sector continues to face macroeconomic pressures, tariff constraints in the US, and rising client expectations for AI-led efficiency. Despite these challenges, the sector has displayed resilience, adaptability, and a commitment to creating value.

Our standalone Q2 FY26 performance remained steady, with EBITDA growing 14.2% QoQ and PAT increasing 16% QoQ, supported by healthy margin improvement. On a consolidated basis, revenue grew 2.3% QoQ and EBIT rose 5.4%, reflecting ongoing productivity gains. For H1 FY26, consolidated revenue grew 90.4% YoY and PAT expanded 47.1%, driven by continued operational momentum. With Network Objects added as a subsidiary in January 2025, consolidated YoY comparisons reflect the broadened business base.

Our ability to leverage and scale AI responsibly will be central to accelerating our transition from stability to stronger growth. With a clear focus on innovation, customer priorities, and disciplined execution, we are confident of delivering sustainable value to shareholders.
