

The Oracle Edge with XTGlobal RPA

Integrate and Automate Business Processes with Ease

In the fast-paced digital economy, businesses seek agile IT solutions. XTGlobal offers comprehensive RPA services, enhancing processes through digitization and automation across ERP, CX, HCM, and more, catering to companies of all sizes for efficient, error-free tasks and optimized processes.

RPA Benefits that Global Organizations Can Capitalize

100%

Efficiency Improved

100%

Reduced Error Rates

80%

Less Time Spent on Routine Tasks 80%

Reduction in Cost

Seamless IT integration

Automate Manually Maintained Spreadsheets and Reports

Businesses using time-consuming, manual processes like AS400, Outlook, Google Sheets and Excel to run reports are inefficient today. Rather, Unattended Bots can be used to optimize the legacy paper/spreadsheets and reporting processes, which would not only speed up the workflows and eliminate manual data entry errors but also result in substantial cost savings every year.

Easy Up-and-Down Scaling

Oracle Efficiency Unlocked with XTGlobal RPA

Be it through Oracle Integration Cloud (OIC) or any direct integration with third-party application, XTGlobal can extend its existing process automation and integration capabilities with leading RPA solutions to create an ultimate digital workforce orchestrating people, systems, and robots. The use cases below highlight how RPA can transform and streamline operations for ERP customers.

Invoice Processing:

RPA bots automate invoice handling by extracting data, verifying accuracy, initiating payments, streamlining the process, and minimizing manual entry.

Procurement Automation:

RPA oversees procurement from Purchase Order creation to vendor invoice processing, seamlessly integrating with Oracle Fusion.

Employee Onboarding:

Automating onboarding cuts admin tasks. Bots enter new employee data, kickstart payroll, and arrange training in Oracle Fusion and PeopleSoft.

Financial Close Process:

Automating financial close processes, including reconciliations and journal entries, speeds up book closure with fewer errors, aiding timely financial reporting.
