

# ORACLE AND XTGLOBAL

DEVELOPING CORE CAPABILITIES FOR  
DIGITAL TRANSFORMATION

Technologies like AI, ML, and Cloud are all changing the way the world operates. Businesses that use these smart technologies to gain efficiency in processes and to develop new business models can experience higher productivity and reduced costs through automation and innovation. Digital transformation goes beyond the use of advanced technology to deliver products and services; it is a change in the very fabric of the company, in the way it operates and creates value to customers.

XTGlobal's deep expertise in cloud enterprise solutions and offerings help companies solve complex problems, rethink their business models, simplify and streamline workflows, and develop innovative offerings. Oracle's adaptive and intelligent cloud technologies such as IoT, Blockchain, ML and AI ensure that the outcome is a modern organization that can accurately depict customers' expectations and react to them in a way that is not just engaging but also more secure.

## DIGITAL TRANSFORMATION ENABLERS

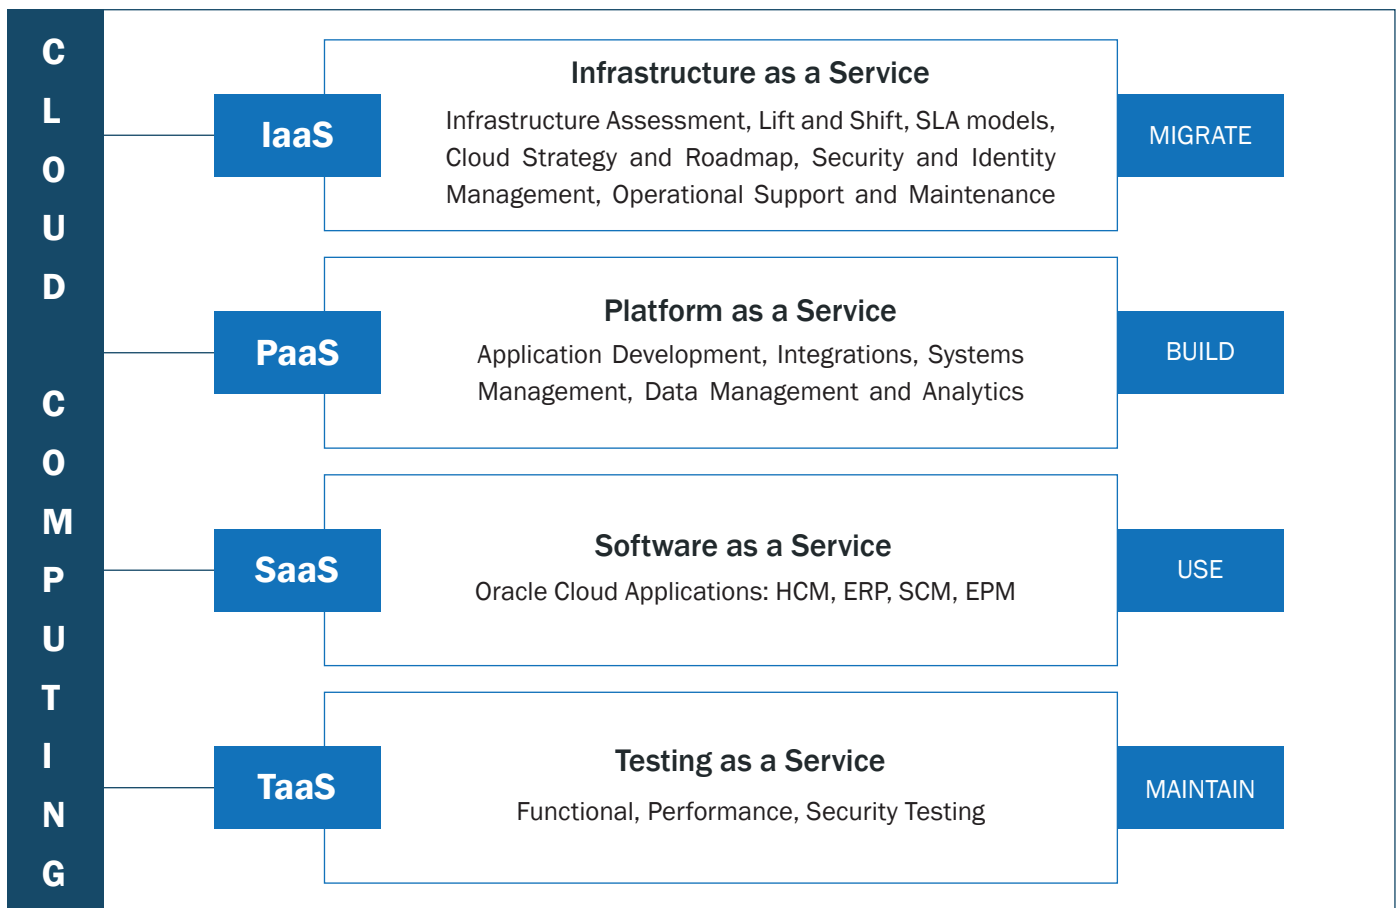

## IAAS, PAAS, SAAS, TAAS

### THE FOUR PILLARS OF DIGITAL TRANSFORMATION

The cloud gives unprecedented power to enterprises in terms of applications, computational capabilities, storage, processing power, databases, networks, and a lot more on a pay-as-you-go basis.

XTGlobal takes the power of the cloud combined with industry expertise and digital knowledge to give enterprises a competitive edge with intelligent, industry-based products and processes.

Creation of adaptive and intelligent applications using technologies such as AI and machine learning improve productivity, decision making, and speedy processing at lower cost. Companies can access real-time insights, gain control over complex processes and derive greater value from investments. XTGlobal can help in your digital transformation journey.
